

The Future Is Built in Data Centers. Be Part of the Infrastructure That Powers the Digital World

Join the **Data Center Operations Manager (DCOM)®** Training Program

The Future Of Digital Infrastructure Depends On The Skills Of Your teams

- Every cloud platform.
- Every AI model.
- Every financial transaction.
- Every critical digital service.

They all depend on data centers.

But the infrastructure powering the digital world is facing a critical challenge: a global shortage of qualified professionals.

Today, more than half of data center operators struggle to find skilled staff, while demand for expertise continues to rise.

At the same time, 67% of operators report significant skills gaps in key technologies, from cooling systems to automation and next-generation infrastructure.

The message is clear:

Technology evolves fast. Skills must evolve faster.

Train The Professionals Who Keep Your Infrastructure Running

Our Data Center Professional Training prepares your teams to operate modern digital infrastructure with confidence.

- Built for real operations.
- Designed for real environments.
- Delivered by industry experts.

- Date:** 22-26 June, 2026
- Certification:** 3 Certifications
- Duration:** 5 Days (40 Hours)
- Language:** English
- Location:** Brussels, Belgium

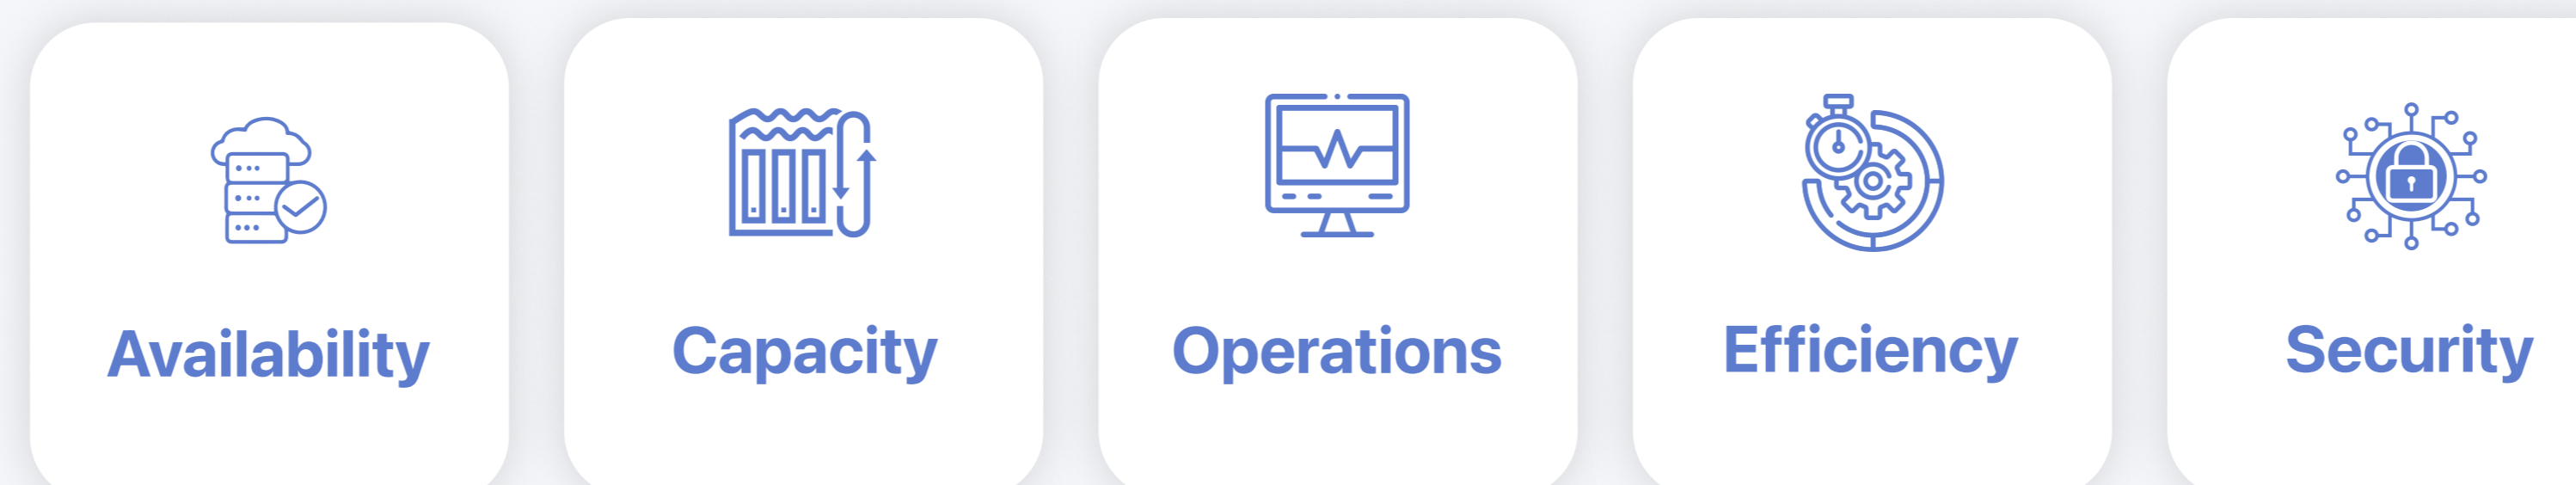

International Data Center Authority (IDCA)
A global organization focused on advancing digital economies and data centers.

Data Center Operations Manager (DCOM)®
The DCOM® course generates distinguished data center operational managers, planners, operations personnel, service providers, and mentors and enables them to have leading roles in proactive mission-critical data center management, maintenance, and operations.

The Data Center Complex

The Technology is evolving. Are your teams ready?

- Infrastructure is becoming more complex.
- High-density computing.
- Advanced cooling systems.
- Automation and intelligent monitoring.
- Energy efficiency and sustainability.

The organizations that succeed tomorrow will be the ones that invest in skills today.

Invest In Skills. Build Stronger Infrastructure

- The digital economy is accelerating.
- AI. Cloud. High-performance computing.
- Your infrastructure must keep up.
- Your teams must lead.

Who Should Take This Course?

- Data Center Professionals
- Data Center Specialists
- Data Center Managers
- Operations and NOC Personnel
- Data Center Supervisors
- Data Center Technicians
- Data Center Strategists
- Data Center Architects

What you will learn

- Advanced data center management principles
- Proactive and preventive data center maintenance
- Analyse data center policies and procedures
- Effective data center operation regimes
- Day-to-day data center operational management
- HR, vendor, 3rd-party, SLA & OLA management
- Advanced data center efficiency concepts
- Key data center optimization mechanisms

YUG KRISHNA
Senior Cloud Infrastructure Architect
AWS

Just returned from IDCA - International Data Center Authority DCOM Training with brainstorming sessions and lots of learning to grab-on. Looking forward for more such engagements with IDCA.
